Across borders. Closer to opportunity.

Business today extends far beyond borders. Methods and etiquette that work domestically do not always translate across languages, cultures, and business customs.

TCS has built—and continues to expand—a global network focused on Asia and extending worldwide. We also support overseas corporations launching promotional activities in Japan.

Our network ensures your overseas promotions are timely, targeted, and effective.

Our global network effectively supports your overseas promotions.

03 / ONE-STOP SUPPORT

06 / OUR PHILOSOPHY

Experience that elevates the “real” stage.

1990

OUR STORY BEGAN

Since our founding in 1990, we have worked across industrial exhibitions, trade fairs, academic and international conferences, private showcases, and presentations.

As environmental responsibility, corporate social impact, and globalization have reshaped our industry, we have continually upgraded our systems to deliver the best, most efficient support for every client.

The most meaningful communication and the spark of business still thrive on real stages—face to face.

Digital tools accelerate the flow of information and compress distance. We will keep leveraging digitization and globalization while contributing fresh ideas and reliable execution to the advancement of our industry and our clients’ businesses.

07 / OUR EXPERTISE

What we do.

01 Industrial exhibitions & international trade fairs

Total coordination—from strategic planning and content to venue selection, space design, visitor attraction, and onsite operations.

We also provide online application systems and turnkey tools for international exhibitions.

02 International & academic conferences

Beyond onsite management, decoration, and construction, we support program design and propose innovative formats for conferences, conventions, symposiums, and anniversary events.

We coordinate every required process to ensure successful outcomes.

03 Private exhibitions & presentations (B2C / B2B)

We analyze organizer goals and visitor perspectives to craft the most effective presentations and traffic plans, incorporating sustainable materials and post-event processing approaches to reduce waste and energize the industry.

04 Sustainability & compliance

We actively address environmental issues—not only waste reduction but also eco-friendly materials and after-event processing—promoting sustainable practices across the value chain.

08 / CONTACT

Let's create the next opportunity.
